## **Composition of regulatory capital (Continued)**

CC1: Composition of regulatory capital (Continued)

Notes to the Template

	Description	Hong Kong basis	Basel III basis		
9.	Other intangible assets (net of associated deferred tax liabilities)	-	-		
	Explanation  As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights ("MSRs") may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to				
10.	connected companies) under Basel III.  Deferred tax assets (net of associated deferred tax				
	liabilities)  Explanation  As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs of the bank to be realized are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

Notes to the Template (Continued)

	Description	Hong Kong basis	Basel III basis		
18.	Insignificant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	_	_		
	Explanation  For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the MA that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business. Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the AI's connected companies which were subject to deduction under the Hong Kong approach.				
19.	Significant capital investments in CET1 capital				
	instruments issued by financial sector entities that are outside the scope of regulatory consolidation				
	(amount above 10% threshold)	-	-		
Explanation  For the purpose of determining the total amount of significant capital investme capital instruments issued by financial sector entities, an AI is required to as amount of loans, facilities or other credit exposures provided by it to any of it companies, where the connected company is a financial sector entity, as if such lost or other credit exposures were direct holdings, indirect holdings or synthetic holding in the capital instruments of the financial sector entity, except where the AI dense the satisfaction of the MA that any such loan was made, any such facility was grasuch other credit exposure was incurred, in the ordinary course of the AI's business the amount to be deducted as reported in row 19 may be greater than that reconstructed in the column "Basel III basis" in this box reamount reported in row 19 (i.e. the amount reported under the "Hong Kong base by excluding the aggregate amount of loans, facilities or other credit exposures connected companies which were subject to deduction under the Hong Kong appre

	I approacii.				

#### Remarks:

The amount of the 10% threshold mentioned above is calculated based on the amount of CET1 capital determined in accordance with the deduction methods set out in BCR Schedule 4F. The 15% threshold is referring to paragraph 88 of the Basel III text issued by the Basel Committee (December 2010) and has no effect to the Hong Kong regime.

#### Liquidity

	30 June 2018 (6 months)
Average liquidity coverage ratio ("LCR") - First quarter - Second quarter	298.91% 234.12%
Average liquidity coverage ratio for the period	260.14%
Net stable funding ratio ("NSFR") - First quarter end - Second quarter end	186.70% 185.05%

The Bank's LCR and NSFR are above the regulatory requirement for the period.

The Bank's average LCR for the period is 260.14%. It is well above the regulatory requirement of 90%. The Bank's NSFR for the first two quarter ends of year 2018 is 186.70% and 185.05% respectively. It is well above the regulatory requirement of 100%.

In the second quarter of 2018, the Bank's LCR declined as a result of decrease in HQLA portfolio.

NSFR remained stable in the first two quarter ends of year 2018.

Level l HQLA is the major component of the Bank's HQLA portfolio, which consists of balance with the HKMA, Exchange Fund Bills/Notes and unencumbered sovereign bonds. The Bank also holds a portion of Level 2A, which include corporate bonds with high credit rating. Customer deposit is the major component of the Bank's ASF source.

LCR net cash outflow and NSFR RSF arising from off-balance-sheet derivatives and additional collateral provision is not material.

The Bank holds Level 1 HQLA denominated in foreign currencies (mainly CNY and USD) to cover respective LCR net cash outflow in foreign currency. The foreign currency LCR mismatch is bolstered mainly by our HKD-denominated HQLA through FX contracts. The Bank has established internal monitoring limit on Level 1 HQLA LCR for foreign major currencies according to the amendment of regulatory framework for supervision of major currency's liquidity risk under LM-1 by HKMA.

The Bank has established internal limit and management action trigger level on LCR and NSFR to ensure our liquidity risk is controlled at the level commensurate with our risk appetite.

(incorporated in Hong Kong with limited liability)

#### **Liquidity (Continued)**

#### Liquidity risk management

Funding liquidity risk relates to the Bank's ability to fulfill its obligations arising from financial liabilities as they fall due, or its ability to fulfill maturing funding needs, which subsequently affects the Bank's capacity to support deposit withdrawal or drawdown on loan commitments. Effective liquidity risk management helps to sustain the expansion of the Bank's business with liquidity cost and risk under control. The Bank has established and implemented its own liquidity risk management policy per local regulatory requirements in order to fulfill its liquidity risk management. The Asset and Liability Management Committee (ALCO) of the Bank is the decision-making body in balance sheet management and is responsible for coordinating and overseeing all related strategies, including risk management framework and risk appetite. Asset and Liability Management Department is responsible for managing daily liquidity position and related executions. Internal Audit Department is responsible for conducting periodic review to ensure liquidity risk management framework is effectively implemented.

The cornerstone of the Bank's funding sources is customer deposit. The Bank strives to build up core deposits while diversifying funding sources via various funding channels to enhance financing capacity. Regarding liquidity arrangement with parent bank, the Bank performs regular funding transfer with parent bank to preserve prompt intragroup backup funding supply if necessary. Monitoring and control on intragroup funding transactions are in line with those of third parties. Moreover, internal limits to control the Bank's reliance on parent bank's funding are in place.

The majority of the liquidity risk of the Bank arises from maturity mismatch of assets and liabilities. Therefore, regular cash flow analysis and projections on both on- and off-balance sheet items falling within different maturity buckets is performed to ensure funding need. Moreover, the Bank closely monitors off-balance sheet funding obligations (such as commitments or letters of guarantee) and assesses their impact to our liquidity capacity. Furthermore, the Bank strives to maintain high marketability of the asset portfolio to allow prompt monetization in case of unforeseeable liquidity crunch in the market.

The Bank has in place various limits and indicators for liquidity risk, including liquidity coverage ratio, loan-to-deposit ratio, interbank borrowing utilization ratio, etc. for effective identification and control of liquidity risk. The Bank utilizes relevant management information systems to perform daily liquidity risk management functions. Moreover, the Bank performs daily cash flow analysis to assess liquidity in normal circumstances, and performs regular stress test (at least monthly) to evaluate the Bank's resilience under significant stress conditions. The stress test scenarios are designed with reference to the HKMA's Supervisory Policy Manuals, and also historical liquidity stress scenarios. The Bank's stress test takes into account the impact of all assets, liabilities and off-balance sheet positions and estimates possible funding short-fall with historical data and plausible stress conditions. The results will be scrutinized and appropriate measures will be taken if necessary.

The Bank has set up early warning indicator system, and movement of relevant indicators are closely monitored on a regular basis. In case of liquidity crisis emerges, the Bank's Crisis Management Committee will be formed to formulate appropriate contingency funding plan to resolve the crisis. The Bank also performs regular drill in order to ensure prompt actions and feasibility of contingency funding plan under crisis.

To cope with unpredictable liquidity needs, the Bank has set up liquidity buffer to maintain sufficient highly liquid assets. The buffer portfolio contains cash, Exchange Fund Bills/Notes, unencumbered sovereign bonds and other high quality bonds, which is managed by Asset and Liability Management Department and operated by Global Markets Department on a daily basis.

#### Additional balance sheet information

#### 1. International claims

The information on international claims are prepared in according to the location and types of the counterparties as defined by the HKMA under the Banking (Disclosure) Rules with reference to the HKMA's Return of International Banking Statistics. International claims are on-balance sheet exposures to counterparties based on the location of the counterparties after taking into account the transfer of risk, and represent the sum of cross-border claims in all currencies and local claims in foreign currencies. Geographical segments, constituting 10% or more of the Bank's total international claims after taking into account any recognized risk transfer, are disclosed below.

Equivalent in millions of HK\$	Bank	Official Sector	Non-bank financial institutions	Non-financial private sector	Total
As at 30 Jun 2018 Developing Asia-Pacific	36,428	2,045	_	2,240	40,713
of which attributed	30,420	2,040		2,240	40,713
to China	35,111	2,045	-	2,159	39,315
Developed countries of which attributed to	22,267	1,590	695	19	24,571
Australia	9,852	1	-	4	9,857
of which attributed to United States	6,476	1,584	695	1	8,756

#### 2. Impaired loans and advances to customers by geographical area

	Gross		Total	Identified			
	amount of	Gross	amount of	Impaired	% of total	Stage 1 & 2	Stage 3
	loans to	amount of	loans and	loans and	loans	provision	provision
	customers	trade bills	advances	advances	and	for ECL	for ECL
	HK\$'000	HK\$'ooo	HK\$'000	HK\$'ooo	advance s	HK\$'ooo	HK\$'ooo
<u>As at 30 Jun 2018</u>							
Hong Kong	34,506,544	622,777	35,129,321	26,907	0.08	117,316	21,168
China	2,227,401	3,661	2,231,062	1,609	-	6,387	1,609
Other countries	160,984	-	160,984	-	-	254	-
	36,894,929	626,438	37,521,367	28,516	0.08	123,957	22,777

The gross amount of loans and advances to customers by geographical segment is in accordance with the location of the counterparties after taking into account the transfer of risk. In general, a transfer of risk arises if the loans or advances of a customer are guaranteed by a party in a country which is different from that of the customer. Geographical segment, constituting 10% or more of the Bank's total amount of loans and advances to customers after taking into account any recognized risk transfer, are disclosed above.

Note: Under section 3(14A) of the Banking (Disclosure) Rules ("the Disclosure Rules"), the Company is exempted from the application of the Disclosure Rules as it has not yet commenced its banking business until 29 January 2018. As such, no comparative figures as at 31 December 2017 are available and no explanation of material changes is applicable.

(incorporated in Hong Kong with limited liability)

#### Additional balance sheet information (Continued)

## 3. The risk concentration analysis for loans and advances to customers by industry sectors (gross)
